WHY LEGALIZING MARIJUANA IS A BAD IDEA

Marijuana is a **gateway drug** to cocaine and meth. Teens and young adults are especially at risk from today's **potent, mind-altering** marijuana, which can permanently damage their developing brains and young lungs. If pot is legalized, health and auto **insurance** will likely **cost more** because increased addictions, accidents, and drug rehab will burden all Californians.

"Drugged driving" will become commonplace. It will be a new "right" to **get high** on marijuana at work, even in transportation jobs. Marijuana legalization means cities and counties can OK selling pot in **grocery stores** and permit marijuana operatives to buy thousands of acres of **farmland**.
